SUMMARY

Full-Stack Developer with **over 2 years of hands-on experience** building and deploying scalable web applications in production. I work primarily with **Vue.js**, **FastAPI**, and **MySQL**, and have a solid background in **REST API** design, **OAuth 2.0** authentication, and database performance tuning. I enjoy working in fast-paced Agile teams and take pride in writing clean, maintainable code that delivers real results.

EXPERIENCE

Full Stack Developer

Symbolist Technology

April 2024 – 30 April 2026 Mumbai

A product-focused company building email campaign management solutions for businesses.

- Built and maintained **FastAPI** backend services to handle high-volume email campaigns — covering scheduling, bounce tracking, error handling, and real-time delivery analytics
- Developed an email filtering and validation module that screens out invalid or spam-prone addresses before dispatch, improving deliverability rates and protecting sender reputation
- Designed responsive **Vue.js** dashboards for campaign creation, contact list management, and live performance monitoring — accessible across desktop and mobile
- Built and documented **REST APIs** for template management, audience segmentation, and campaign tracking, used across multiple frontend clients
- Optimised **MySQL** queries and introduced database indexing, reducing server load and noticeably improving campaign processing speeds
- Implemented **OAuth 2.0** and role-based access control (**RBAC**) to ensure secure, permission-based access for different user roles across the platform
- Containerised the full application stack using **Docker**, enabling consistent and reliable deployments across development and production environments
- Worked closely with designers, QA engineers, and backend developers in Agile sprints to ship features on time

EDUCATION

Bachelor of Science in Information Technology

University of Mumbai

2019 – 2022 Mumbai

LANGUAGES

English	Professional proficiency
Hindi	Native speaker
Marathi	Proficient

KEY ACHIEVEMENTS

- Faster API Performance**
Reduced backend response times significantly through query optimisation and smarter database indexing
- Improved Frontend Speed**
Refactored Vue.js component structure, resulting in faster page rendering and a smoother user experience
- Production-Ready Deployments**
Deployed and maintained multiple full-stack applications in live environments, containerised with Docker for stability

SKILLS

PROJECTS

Bulk Email Campaign Management Platform

April 2024 – April 2026

End-to-end platform for businesses to manage large-scale email campaigns

- Enabled clients to create, schedule, and send campaigns at scale with real-time tracking of open rates, click-through rates, and bounces
- Built reusable modules for email templates, contact list segmentation, and scheduling — adopted by multiple business clients

Email Filtering & Validation Module

April 2024 – April 2026

Automated validation layer built into the campaign sending pipeline

- Built a bulk email validation API that catches invalid or risky addresses before sending, reducing bounce rates and protecting sender reputation
- Optimised database queries for high-volume validation jobs, cutting processing time meaningfully for large contact lists

INTERESTS

Sports & Continuous Learning

Love cricket and football. Outside work, I enjoy exploring ethical hacking and keeping up with the latest developments in tech
